

# Coaching Experiences...

***Kalpesh is a great mentor and coach. In his own unique ways, he guides you with practical concepts for growth and self improvement. His methods are easy to practice and still provide an opportunity to think deeply about your problem area (life, etc.) e.g. - where am I today, how I envision myself in the future across various aspects of concerns, and how to build a bridge to reach there. Best thing I like about Kalpesh's mentoring style is that he first understands what space/s you operates from and then suggests small tweaks that are easy to adopt and result in major improvements overtime. With few of the methods, I have started experiencing improvements in the way I approach things.***
